Dear Madam/Sir:

Mass media today mention about the incidence of dengue that has multiplied mortality among the population particularly the children. Actually, even older members of the population had been affected by this dreaded disease, causing alarm among health authorities. This should be everybody's concern, because if we do not do something to about the situation, people especially young ones will suffer.

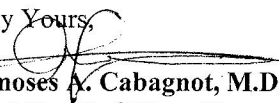

Marginalized members of the community live in slum areas. Congestion in these areas also promotes unsanitary living conditions, where breeding places are found. The unsanitary conditions promote multiplication of mosquitoes that harbor the dengue virus. Due to lack of knowledge of these people about the nature, and hazards brought by these mosquitoes, more dengue cases are being reported. It is therefore important that we educate and enlighten our people about the cause and control of dengue.

In this connection, we would like to invite **(3) MAPEH teachers of this city to attend a Live-in Training on Integrated Vector Management on June 13-15, 2018 at Panda Tea Hotel and Restaurant, J.A Clarin st. , Tagbilaran City. Board and Lodging shouldered by PHO while transportation expenses from sending agency. Participants are also requested to bring USB.**

For inquiries please contact **Mr. Leonidas L. Saniel**, Dengue Coordinator of the Provincial Health Office with tel. number: 411-2225/09434857830.

Your consideration for this endeavor is highly appreciated. God bless and more power.

Very Truly Yours,

for 
Dr. Reymoses A. Cabagnet, M.D, MPH
