Counselling Skills Level 2

Many people find it helpful to seek counselling at some point in their lives, and a counsellor can provide support for people in all sorts of situations. If you're interested in supporting people to improve their personal well-being, this course will provide you with the correct understanding, knowledge and skills to do that. You'll learn about core counselling skills and how to use them in a counselling relationship. You will also be taught about counselling theory and the ethical framework that informs how counsellors use their skills.

Mental Health First Aid Level 2

It's important that employers are transparent and open about mental health issues, and this qualification builds an understanding of mental health problems and the support available to colleagues. Increasing the understanding of the mental health of staff at all levels builds a culture of care and support.

Understanding Autism Level 2

This course will give you an understanding of autism and the principles of supporting individuals with autism. You will look at the person-centred approach and the influence that positive communication methods can have and will gain an understanding of how individuals with autism can be supported to live healthy and fulfilled lives.
